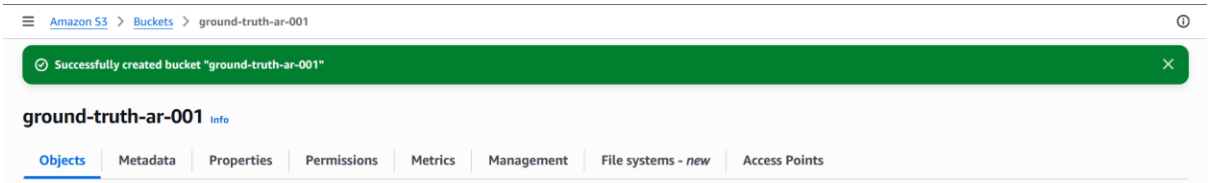
Setting up Ground Truth Workforce

To Begin with the Lab

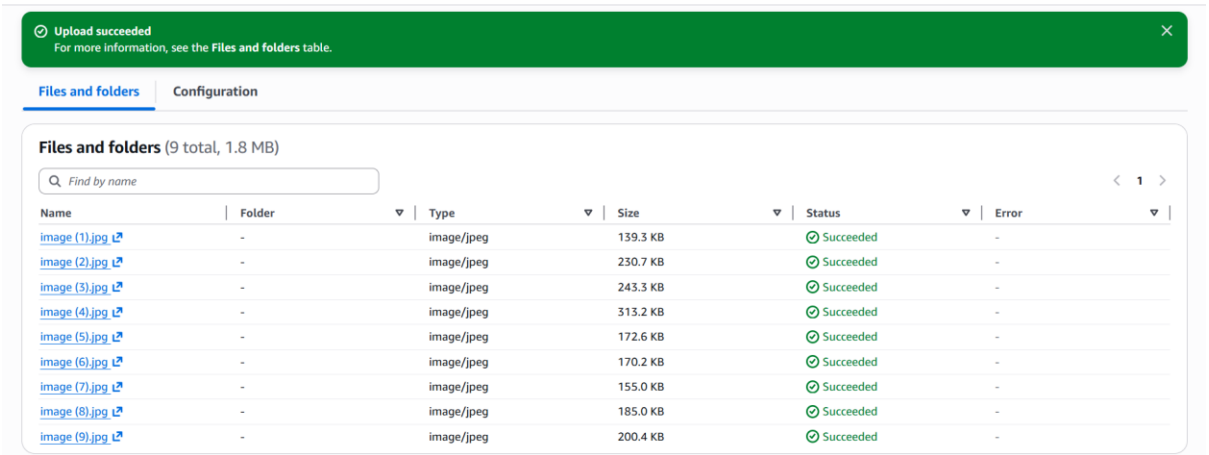
Summary of the Lab

Upload images to an S3 bucket. In Amazon SageMaker Ground Truth, create a private workforce using Amazon Cognito. Set team details, invite workers via email, and complete account setup. Finally, log into the worker portal to verify access and begin labelling tasks.

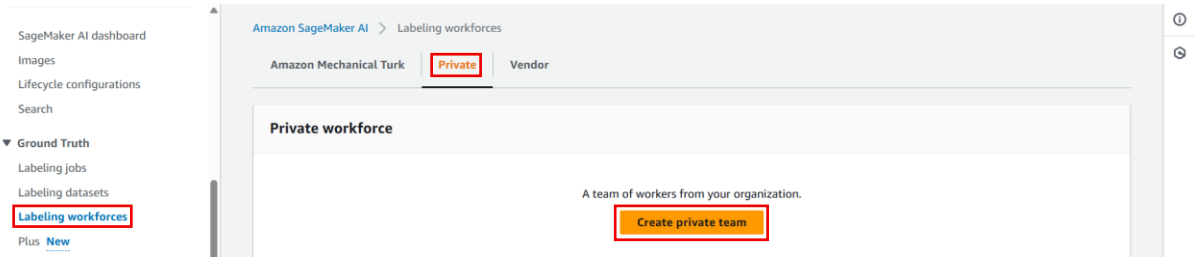
- Prepare Data in S3
- Open Amazon S3
- Navigate to Amazon S3.
- Click Create bucket.



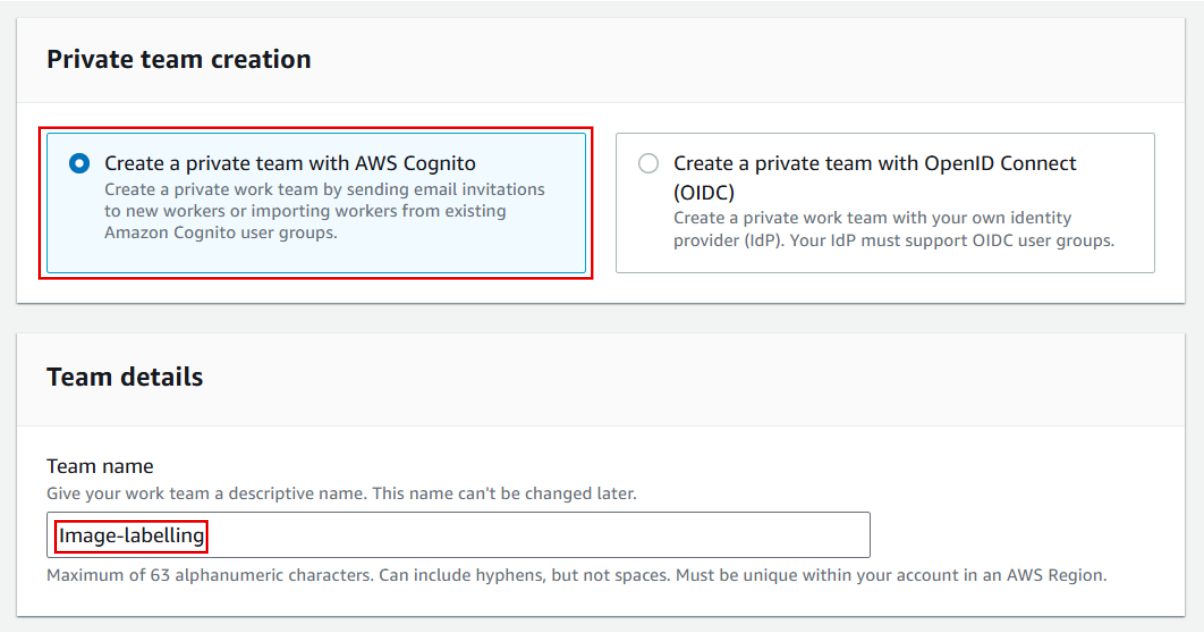
- Open the created bucket.
- Click Upload.
- Add image files
- Click Upload.



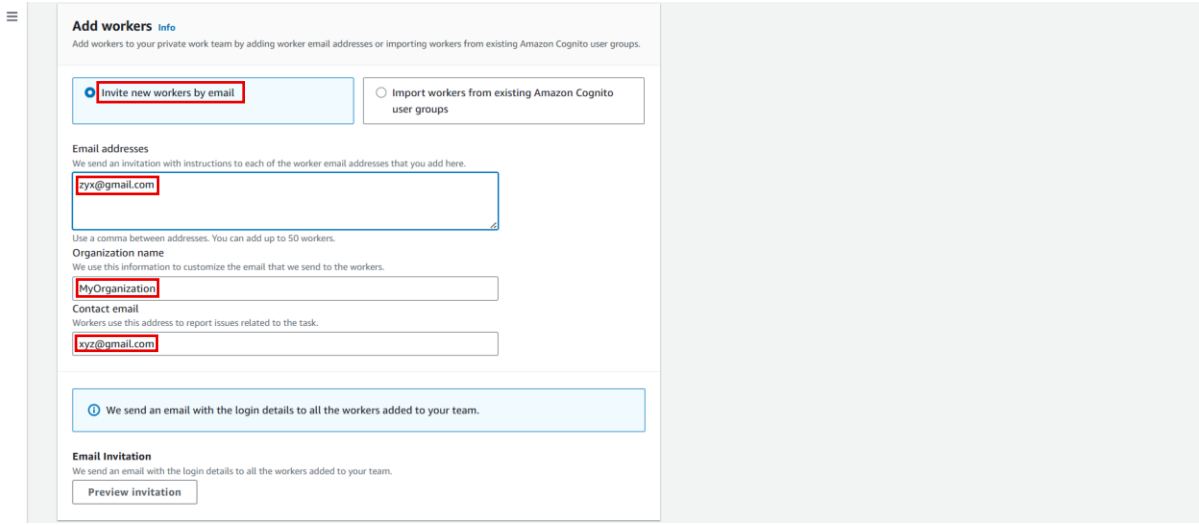
- Go to Amazon SageMaker.
- Navigate to Ground Truth → Labelling workforces.
- Select:
- Private workforce



- Create Private Team
- Choose:
- Private team with Amazon Cognito
- Configure Team Details
- Enter:
- Team name: image-labelling

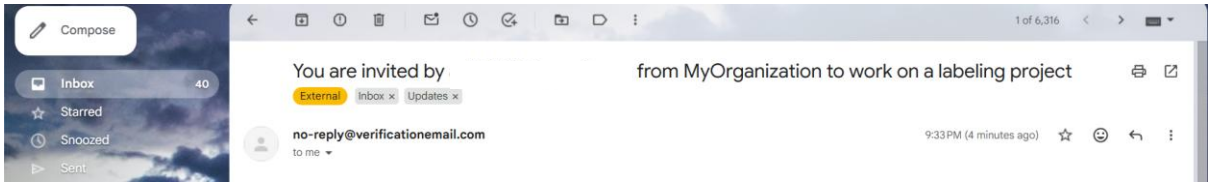


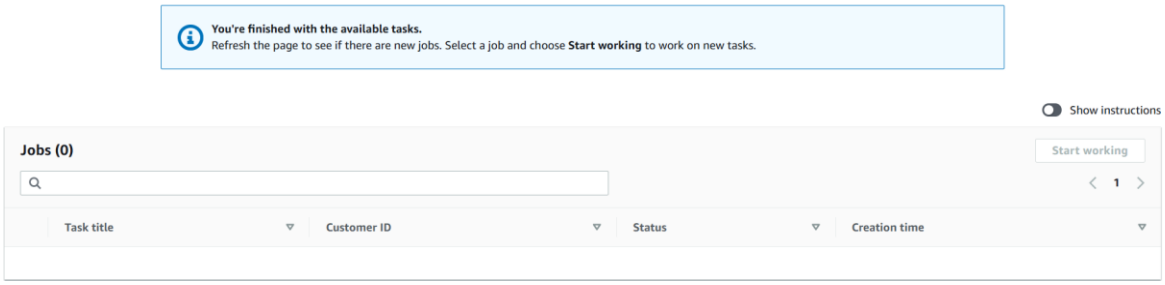
- Worker email(s): (your email or multiple users)
- Organization name: (e.g., MyOrganization)
- Contact email: (for support/questions)



- Click Create private team

- Check invited users' inbox, open the invitation email, and click the provided link. Enter username and temporary password from the email, then create a new password meeting requirement.





- Log Into Worker Portal
- Access labeling portal
- Verify login success
